COMPANY INTRODUCTION

ABOUT US

Plasti Pack Overseas is a prominent manufacturing company based in Ahmedabad, Gujarat, India, specializing in the production and supply of state-of-the-art machinery and equipment for various industries. With a strong focus on manufacturing, processing, packaging, and testing equipment, the company has established itself as a leader in providing high-quality solutions to meet diverse industrial needs.

Leading Manufacturing: Plasti Pack Overseas prides itself on being a leading manufacturer in the industry, offering an extensive range of machinery and equipment catering to the manufacturing, processing, and packaging sectors. The company's commitment to innovation, quality, and reliability has positioned it as a frontrunner in the market.

OUR MISSION

- 1. Deliver Excellence :** We are committed to delivering the highest quality Plastic, Packaging, and Testing Machinery, setting new standards for performance and reliability.
- 2. Client-Centric Approach :** We prioritize our client's unique needs and provide tailored solutions that drive their success.
- 3. Global Reach, Local Presence :** We aim to seamless support to our worldwide clients through a network of dedicated service centers and partners.

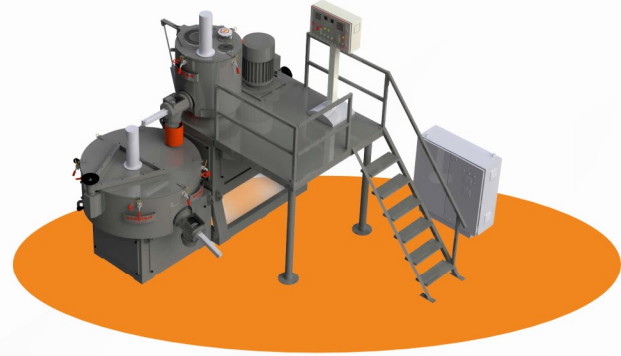

OUR VISION

To be at the forefront of innovation and excellence in the Plastic, Packaging, and Testing Machinery industry, we aspire to shape the future of manufacturing by providing state-of-the-art machinery solutions that optimize efficiency, reduce environmental impact, and empower businesses worldwide.

PLASTIC PROCESSING MACHINERY

HIGH SPEED HEATER COOLER MIXER

SPECIFICATION	
Mixer Vessel Volume	: 15 Litre
Batch Capacity	: 3kg to 5kg
Mixing Tool	: 3 Tier or 4 Tier
Support Structure	: SS 304
Applications	: PVC Pipes & Fittings Industry, Masterbatch Industry, R&D departments of Polymer Industry

HIGH SPEED MIXERS

SPECIFICATION	
Vessel Capacity	: 10 to 3000 Ltrs
Bath Capacity	: 3 to 500 Kg
Production Capacity	: 15 to 2500 kg/hr
Cooling Surface	: 1.3 to 14.5 sq.m
Applications	: Plastics, Masterbatch, Compounding, Powder Coating

LAB MIXER

SPECIFICATION	
Mixer Vessel Volume	: 15 Litre
Batch Capacity	: 3kg to 5kg
Mixing Tool	: 3 Tier or 4 Tier
Support Structure	: SS 304
Applications	: PVC Pipes & Fittings Industry, Master batch Industry, Polymers research laboratories

PLASTIC PROCESSING MACHINERY

PULVERIZE

SPECIFICATION	
Machine Capacity	: 15 - 45 kg
Motor Capacity (kw)	: 15, 30, 55
Automation Grade	: : Fully Automatic, Semi Automatic
Support Structure	: SS 304
Applications	: Pipes & Profile Industry, Powder for Roto Moulding Industry

GRANULATORS

SPECIFICATION	
Machine output Capacity	: 100-500 kg/hr
Rotor diameter	: 19.7 inch
Rotor speed	: 400 rpm
Motor Power(standard):	: 75 to 125 hp (Full load amps based on motor size)
Height	: 118.8 inch
Width	: 60.9 to 94.9 inch
Feed hopper opening width	: 28.3 to 63 inch
Width	: Blow Moulding, Extrusion, Rotational Moulding, Injection Moulding, Recycling

PACKAGING MACHINERY

GROSS WEIGHT PACKAGING MACHINE

- Model- vp-Gwp-sf
- Gross Weighing Machine With Screw Feeder Is Used To Open Mouth Bags For Hazardous And Hygienic Material, Chemical Powder, Moisture Contain Powder.
- Packing size-5 - 50 kg bags
- Packing speed - upto 3 ton per hour
- Different Feeding Device Are Available- Belt Feeder , Single And Double Screw

NET WEIGHT PACKAGING MACHINE

- Model- VP-NWP / VP-CWP
- Net weighing and Combo weighing machine is used for pack open mouth and jumbo bags for Polymer, master batch, Grain, pulses and free flow powder.
- Packing Size- 5-50 kg and 500-1000 kg jumbo bags
- Different feeding device available like Gravity feeding , belt feeder, screw conveyor

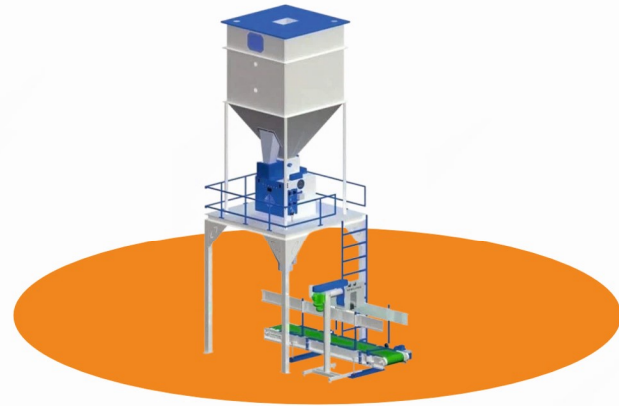

JUMBO WEIGHT PACKAGING MACHINE

- Model-VP-JWP
- Jumbo Weighing Machine Is Used For Packing Jumbo Bags For Granules,fertilizer,grain,pulses,free Flow Powder.
- Packing size- 250 to 1000 kg bags
- Packing speed- 5 to 10 tons per hour
- Different feeding device available like gravity feeding, belt feeder,screw conveyor.

COMBO WEIGHT PACKAGING MACHINE

- Model-VP-GWP
- Gross weighing machine is used to pack open mouth bags for polymer, master batch, fertilizer, pulses, grains, free flow powder Packing size- 5- 50 kg bags
- Packing speed- up to 3 ton per hour
- Different feeding device are available - gravity feeding, belt conveyor, screw conveyor

PLASTIC TESTING MACHINERY

UNIVERSAL TESTING MACHINE

DIGITAL PUNCTURE RESISTANCE TESTER

MOISTURE ANALYZER

DIGITAL HYDROSTATIC PRESSURE TESTER

MOTORIZED NOTCH CUTTER

MUFFLE FURNACE (ASH CONTENT TESTER)

IMPACT TESTER

HOT AIR OVEN

PLASTIC TESTING MACHINERY

HEAT SEAL TESTER

VICAT SOFTENING POINT (VSP/HDT) APPARATUS

FREE FALLING DART IMPACT TESTER FOR FILM

DIGITAL DENSITY WITH MICRO BALANCE

IZOD / CHARPY TESTER

CARBON BLACK DISPERSION TESTER

HUMIDITY CHAMBER

CARBON BLACK CONTENT TESTER

OPACITY TESTER

E.S.C.R TESTER

GSM WEIGHING BALANCE WITH ROUND CUTTER

DIGITAL BURSTING STRENGTH TESTER
